

AOC

Extensive solutions for aspiring professionals

Meet the new P2 Series

The new P2 Series designed with professionals in mind

Stunning visuals, rich connectivity and ergonomics locked in a slim and modern design creates a perfect environment for extensive work.

Compliant with highest standards

Compliant with important regulations such as EPEAT, TCO, Energy Star and GS, the AOC monitors are both energy efficient and environmentally friendly.

Rich connectivity

AOC business monitors support a broad variety of display connections, such as VGA, HDMI and Display Port, some models additionally featuring DVI sockets. They are available in sizes from 21.5" to 34", offering a perfect solution for workstations of every size.

Healthy workspace

Fully ergonomic stands assure correct posture even during long working sessions, and VESA mount for easy assembly on monitor arms.

Crisp imagery

A great variety of resolutions, up to UHD. All models equipped with IPS panels assuring beautiful colour reproduction and wide-viewing angles*.

CU34P2

Immerse yourself in work with this 1500R curved QHD display

Excellent performance for professional demands

* exception of CU34P2A

Power up your workstation

with the USB-C connectivity

Professional users look for displays not only with excellent **image quality**, but also ones that assure **easy and fast** set up and configuration while keeping the **desk neat and tidy**. An integrated USB-C standard in AOC monitors provides a **simple, practical way** to carry multiple signals, such as transferring data, connecting video and powering devices on one cable only.

Transfer video, data and power with **one cable only**

Extend your laptop display **without additional external power supply**

Save space and money with a **feature-rich solution**

Ultra-fast

The USB 3.2 standard provides 20 times the speed of USB 2.0. That means data transfers can be completed much faster than you are used to. For example, a full 4K movie, can be transferred in less than 60 seconds.

Video transmission

Highly versatile, USB Type-C supports full DisplayPort audio/video with backward compatibility to VGA, DVI, and HDMI through dedicated adapters. This lets you connect your device to one DisplayPort monitor.

No power cables

One USB-C port delivers up to 65W to your laptop or smart devices, which allows you for a tidier desk with one cable only. AOC monitors are compatible with a broad range of laptop and phone models.

Simplicity at hand

The new USB 3.1 Type-C cable is designed with a slim and reversible connector, which means that you will never fumble with the cables to find the correct orientation anymore.

* USB-C connection available in 27P2C and 24P2C models
